Expo Venue

... It's also
Planned Site for IR & Casino...

YUMESHIMA

is
Useful
but

Dangerous!

Do you think this is really
an appropriate place for
an Expo site !?

Biodiversity Hotspot

Before the construction of the IR, casino, and Expo, there were 113 species of birds, 193 of plants, 104 of insects, including the endangered were confirmed...

- Arsenic • PCB
- Fluorine • Dioxins
- Cesium ...

PCB sludge drain bag

Final Waste Disposal Site

Will be in operation during the Expo!!

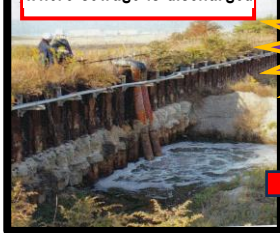

⚠ Gas vent pipes are buried underground in a network pattern!
The off-limits area is now an event plaza !!

2024/03/28
Gas Explosion

83 venting pipes
(It sinks and the length is different)

Where sewage is discharged

- Fire ants • Fly • Tick
- Mosquito • Infectious disease • Food poisoning

Expo Site

- Methane Gas
- Carbon Monoxide
- Hydrogen Sulphide
- Ammonia

Dumping Site for Dreged Sediment

Filling the expo site with purchased soil from elsewhere, and seawater added to make it "Water Plaza" As a result, the embankment of "The Grand Ring" is now getting eroded.

A Key Logistics Hub

Since there is only one bridge and one tunnel, there is a risk of massive traffic jams due to container trucks, construction vehicles, and Expo shuttle buses.

Mega Solar. fire risk
Parking Lot (PCB)

IR • Casino Site

Soil improvement and liquefaction countermeasures work in progress.

Yumeshima Sta.

Container Terminal

Yumemai Bridge: Closed Due to Strong Winds

Yumesaki Tunnel: Flooded by heavy rain

Soft Ground → Liquefaction
Tall Buildings Are Impossible

Subsidence
Even Kansai International Airport has already sunk 17M and is still being jacked up !

Uncertain Access →
No Escape Routes !

Danger:
Earthquake
Tsunami

⚠ 2024/08/09 →
"Nankai Trough Earthquake Warning" announced
